

# ALPS 150/160

## INPUT CONVEYOR UNIT

- Servo motor-driven tracking unit
- Independent encoder
- Feeder tracks at each end of the line

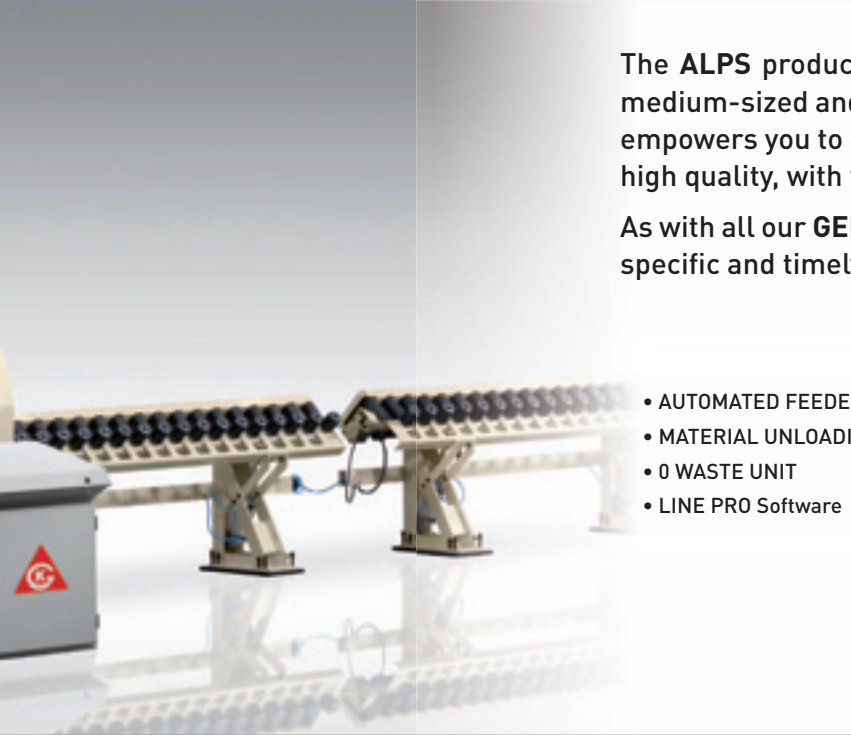

## PUNCHING UNIT

- Three different punches per wing
- Diameters up to 1-9/16"
- Hydraulic hold down
- CNC-controlled gauges

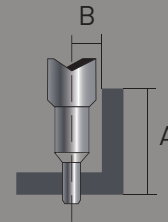

The **ALPS** product line is the most complete solution for punching, marking and shearing of angles for medium-sized and large steel profiles. It's sleek design, all-purpose functionality and proven performance, empowers you to execute a greater range of operations and produce a wider variety of pieces. Low cost and high quality, with the added extra of allowing you the flexibility to process flat bar and U-profiles, as well.

As with all our **GEKA** products, customizing your machines from our wide variety optional peripherals offers specific and timely solutions based on your special requirements.

Available

- AUTOMATED FEEDER
